

High-ranking, green expertise, now within reach

A network of first class experts from Dutch institutes and universities offer their expertise

opinions, feasibility studies, expert judgement, co-creation, panel members, reviews

professional, smart and reliable

..... the world demands

"more mouths to feed, more people ready to consume meat products ... and a larger population living in metropolitan conglomerations"

Twice as much production using 50% input

Check on climate change

Reliability in availability of food

Safe and healthy food

..... Europe demands

"Licence to produce will become licence to deliver, creating a lifestyle for farming; proactive farming for food, environment, nature and wellness"

CO₂ footprint

Water saving and reuse

Efficient (re)use of minerals

Services for ecosystems

Agricultural and horticultural production chains are the green basis for sustainable production of food, resources and raw materials

Recycling of resources forms the basis of green production and ecology

Green genetics and objective phenotyping are the key to responsible breeding

Biodiversity creates solutions for health, energy (re)generation, and recycling

How it works

If you are interested in granting GreenUniversity an assignment, you can get in touch with us and make an initial appointment with Daan Kuiper or Bert van Duijn. After this meeting we shall get back to you with a description of the assignment. If you agree to convert this into a proposal, then we will send you a quotation and our general conditions. The quotation includes the agreed description of the assignment, time phasing, contact frequency and the type(s) of product GreenUniversity will deliver. This can be a traditional report or a digital report of course, but a presentation, flyer, app or other form is also possible. We could also arrange a public event if more publicity is required and we can also organise or assist, e.g. by using Twitter to back up this event.
